- <sup>1</sup> If licensing by Named User Plus, the minimum is 10 Named User Plus licenses per Processor.
- <sup>2</sup> Enterprise Edition Options (with the exception of In-Memory Database Cache and In-Memory Database Cache for Oracle Applications) and Database Enterprise Management Packs (with the exception of Data Masking Pack and Test Data Management Pack), must match the number of licenses of the associated Oracle Database Enterprise Edition. For the purposes of licensing Data Masking Pack and Test Data Management Pack, all database servers where masked data or test data originates and database servers performing masking, or test data management operations (via GUI or command line) must be licensed. Database servers to which masked data is copied do not require a license for these programs. For the purposes of licensing the following program: In-Memory Database Cache, and In-Memory Database Cache for Oracle Applications, only the processors on which the Times Ten In-Memory Database component of the In-Memory Database Cache program is installed and/or running must be counted for the purpose of determining the number of licenses required. In addition, a minimum of 25 Named User Plus licenses per Processor must be met. In the case where the minimum number of Named User Plus licenses are/were purchased, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. If licensing by Processor, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. Associated Database is defined as the database(s) which is (are) being managed by the option. For the purposes of licensing Active Data Guard, both the primary and standby servers must be licensed.
- <sup>3</sup> Application Adapters are available for: PeopleSoft, SAP, Siebel & JD Edwards.
- <sup>4</sup> Mainframe and TP-Monitor Adapters are available for: CICS, IMS/DB, IMS/TM and VSAM.
- <sup>5</sup> Oracle Database Standard Edition can only be licensed on servers that have a maximum capacity of 4 sockets. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses. Oracle Database Standard Edition, when used with Oracle Real Application Clusters, may only be licensed on a single cluster of servers supporting up to a total maximum capacity of 4 sockets.
- <sup>6</sup> If licensing by Named User Plus, the minimum is 25 Named User Plus licenses per Processor.
- <sup>7</sup> Personal Edition provides a maximum of one Named User Plus per database.
- <sup>8</sup> Oracle Standard Edition One may only be licensed on servers that have a maximum capacity of 2 sockets. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.
- <sup>9</sup> Application Server Enterprise Management Packs must match the number of licenses of the associated Oracle Application Server (Excluding TopLink and Application Development Framework, for which these Management Packs cannot be licensed). WebLogic Server Management Pack Enterprise Edition can only be licensed with WebLogic Server Enterprise Edition, or WebLogic Server Standard Edition, or Internet Application Server Enterprise Edition, or WebLogic Suite. Application Management Suite for Oracle Fusion Applications can only be licensed with WebLogic Suite, together with the SOA Suite for Oracle Middleware and must match the number of licenses to the associated WebLogic Suite and the SOA Suite for Oracle Middleware. When licensing Management Pack for GoldenGate, the number of licenses must match the associated GoldenGate, GoldenGate for Non Oracle Database, and/or GoldenGate for Mainframe licenses. In the case where the minimum number of Named User Plus licenses are/were purchased, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. If licensing by Processor, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. An associated Application Server is defined as the Application Server(s) which is (are) being managed by the option. Note that Management Pack for Oracle Coherence may only be licensed with Coherence Enterprise Edition or Coherence Grid Edition. When licensing Management Pack for Oracle Data Integrator, the number of licenses must match the associated Data Integrator Enterprise Edition, or Data Integrator and Application Adapter for Data Integration, or Oracle Data Integrator Enterprise Edition for Oracle Applications licenses.

For more information on the CA process and approval, please refer to the Controlled Availability section on eSource at <http://esource.oraclecorp.com> > Controlled Availability Sales Questions. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- <sup>11</sup> WebLogic Suite Options and WebLogic Suite Options for Oracle Applications must match the number of licenses of the associated WebLogic Suite application server. In the case where the minimum number of Named User Plus licenses are/were purchased, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. If licensing by Processor, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. Associated Application Server is defined as the application server(s) which is (are) being managed by the option.

- <sup>1</sup> An option must be licensed at the same level (or greater than) as its parent. Example: number of Flow Manufacturing users = number of Discrete Manufacturing users. If the parent has multiple metrics, the option must be licensed at the same level as its parent for each metric. Example: number of Advanced Pricing users = number of Order Management users AND number of Advanced Pricing Electronic Order Lines = number of Order Management Electronic Order Lines.
- <sup>3</sup> Order Management is licensed based upon the number of application users AND the number of electronic order lines entered from any source other than those entered by licensed Order Management Users. Order Management User licenses are required for all individuals who are using Order Management. In addition, any order that is entered electronically into Order Management must be licensed using the Electronic Order Line metric. This applies to order lines originating in iStore, Quoting, EDI/XML transactions, legacy applications or any other source. (Order lines entered manually by the licensed Order Management users are covered under the Order Management User license).
- <sup>4</sup> For the purpose of licensing this program (except Healthcare Transaction Base), only the processors on which iAS Standard Edition and/or Enterprise Edition and this program are running are counted for the purpose of determining the number of processors required to license this program.
- For the purpose of licensing Healthcare Transaction Base, only the processors on which iAS Enterprise Edition and this program are installed and/or running are counted for the purpose of determining the number of processors required to license this program.
- <sup>6</sup> Configurator can be licensed by Application User OR by Processor. If licensing by Application User, then the actual users accessing Configurator must be counted. If the user population accessing Configurator is uncountable, then the Processor metric must be used.
- <sup>8</sup> Customers must pay for both the module and the subscriber/workstation fee.
- <sup>12</sup> Customers who licensed Oracle applications under the 'E-Business Suite' bundle can continue to purchase licenses per pages 5 and 6 of the March 7, 2003 price list. This rule also applies to customers who do not have a price hold. Please note that as of January 9, 2009, the product CADView-3D is no longer included in any additional 'E-Business Suite' licenses sold.
- Customers who licensed Oracle applications under the 'E-Business Suite 2003' bundle can continue to purchase Professional User and Professional User – (external usage) licenses, per page 8 of the December 1, 2006 price list. This rule also applies to customers who do not have a price hold. Please note that as of January 9, 2009, the product CADView-3D is no longer included in any additional 'E-Business Suite' licenses sold.
- <sup>13</sup> If Managed Assets are \$10 billion or less, the price per \$M in Managed Assets is 2,300. If Managed Assets are greater than \$10 billion, the price per \$M in Managed Assets for the first 10,000 licenses is 2,300, and the price per \$M in Managed Assets for each additional license is 1,150.
- <sup>14</sup> This product is on Controlled Availability (CA) and requires approval. For more information on CA process and approval, please refer to the Controlled Availability section on eSource at <http://esource.oraclecorp.com> > Controlled Availability Sales Questions. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- <sup>15</sup> Where Inventory Management is licensed across multiple plants or warehouses, the Inventory Management options (Mobile Supply Chain Applications, Warehouse Management) can be licensed individually for each plant/warehouse. Within each plant/warehouse using the Inventory option, the option must be licensed at the same user count as Inventory Management or the actual user count, whichever is greater.
- <sup>16</sup> Where Discrete Manufacturing is licensed across multiple plants, the Discrete Manufacturing options (Mobile Supply Chain Applications, etc) can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user count as Discrete Manufacturing or the actual user count, whichever is greater.
- <sup>17</sup> Where Projects is licensed across many lines of business, the Project Billing option to Project Costing can be licensed individually for each line of business. The Project Billing option, the option must be licensed at the same user count as Project Costing.
- <sup>20</sup> Where Process Manufacturing is licensed across multiple plants, the Process Manufacturing options (Mobile Supply Chain Applications, etc) can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user count as Process Manufacturing or the actual user count, whichever is greater.
- <sup>21</sup> Sales Contracts Application User licenses are required for all contract administrators, legal staff, order administrators and sales personnel who manage the contracts library or author contracts.
- <sup>25</sup> If you license the Self Service Work Request option in conjunction with EAM, you are required to maintain licenses for the equivalent number of EAM Users licensed and you are granted unlimited access to initiate work requests, view work request status and view scheduled completion date for your entire employee population.

- <sup>43</sup> Licensing Customer Hub provides rights to use Oracle Customer Data Hub (CDH) and/or Siebel Universal Customer Master (UCM). If running both, licenses for the sum total of item records managed across the two products must be purchased.
- <sup>44</sup> Only available with Siebel Universal Customer Master (UCM) product.
- <sup>45</sup> For Master Data Management (MDM) products, the Oracle EBS applications products include the standard, restricted use of underlying Oracle technology. The Siebel applications products do not include a restricted use of underlying Oracle technology.
- <sup>46</sup> For Oracle Sourcing, Oracle iSupplier Portal, Oracle Services Procurement, Oracle Supplier Lifecycle Management, Agile Product Cost Management, Agile Product Supplier Collaboration for Process, and Agile Product Quality Management for Process programs, use by your external suppliers is included with your licenses.
- <sup>48</sup> AutoVue includes a Desktop deployment, and a Client/Server deployment. For the Application User licensing metric (in the Component licensing model) or the Custom Suite User licensing metric (in the Custom Applications Suite licensing model), a single license cannot be split or shared between two users (e.g., one user using the AutoVue Desktop Deployment and a different user using the Client/Server deployment would require two licenses).
- <sup>49</sup> Integrations are available for: SharePoint, Documentum, and Oracle Universal Content Management. Each integration is licensed separately.
- <sup>50</sup> Agile PLM ERP Adapters are available for: Oracle E-Business Suite, JD Edwards Enterprise One and SAP R/3 4.0b and higher.  
Agile Engineering Data Management ERP Adapter is available for: SAP R3/4.7 and higher. SAP Adapter is Priced in Advanced of Availability.
